

Jamie Gray

Full-Stack Web Developer & Product Engineer with 8 years of experience designing, building, and shipping production web applications for startups and growth-stage companies. Experienced across frontend, backend, APIs, and databases, with a strong emphasis on performance, security best practices, and maintainable systems. Uses AI-assisted workflows to accelerate development without compromising code quality.

Fort Worth	Product Engineer Freelance	Dec 2025 → Present	
	<ul style="list-style-type: none"> ◆ Building full stack web applications using Claude Code, Vercel, NextJS, Supabase ◆ Lucent Wash: Landing page, client booking / scheduling, client login, automated text message reminders flows for a locally-owned window washing small business ◆ Staged for Living: Landing page, a locally-owned home decoration company 		
Fort Worth	Founder WeWrite, Inc. (Consumer Social)	Mar 2025 → Present	
	<ul style="list-style-type: none"> ◆ Using AI code generation agents and cutting-edge models to build new functionality on WeWrite, a writing app where each page is a fundraiser. ◆ Built various admin-only dashboards tools to monitor user activation and feature adoption ◆ Designed custom email templates and integrated with Resend email service ◆ Rebuilt the UI to use a consolidated color token system to be customizable at the user level, consistent card styles for glassmorphic look. ◆ Refactored all Javascript files to be type-safe using Typescript instead ◆ Built an API layer to replace direct Firebase database calls, making the platform more scalable and maintainable 		
NYC	Product Designer Turbo Design (Agency)	Aug 2024 → Mar 2025	
	<ul style="list-style-type: none"> ◆ Client: Vondy (B2B) — Designed key features for Vondy to boost user engagement, built high-fidelity prototypes that helped secure investor funding. ◆ Client: Ramp (B2B) — Redesigned existing flight booking functionality, created new designs for Hotel booking and Car rentals ◆ Client: Precision AI (B2B) — Designed UX flows for a seed-stage startup building a tool for Private Equity managers to identify companies related to their existing portfolio that might be worth pursuing. 		
Dallas	Product Designer Whop (Consumer Social)	Jul 2023 → May 2024	
	<ul style="list-style-type: none"> ◆ Redesigned Whop's core navigation and user flows, transforming it from a transactional store page into an experience platform where customers engaged with their purchased products — driving higher retention and session time. ◆ Created high-fidelity designs, user flows, & prototypes for key features across the iOS app and web platform ◆ Built a theme-friendly color token system and streamlined components to keep design consistent across the product. 		
Dallas	Product Designer ParkHub (B2B)	Jun 2017 → Jan 2023	
	<ul style="list-style-type: none"> ◆ Designed several web apps for business intelligence and operations management as well as an iOS MPoS app ◆ Collaborated closely with engineering, product, and marketing teams. ◆ Organized design system to make it easier for engineering handoff and design team collaboration ◆ Onboarded and mentored a junior designer to assist with new feature development
